### A Desktop Solution for Producing Low to Mid-Volume Runs of Discs... In-House!

First there were the Print Factory and PF-2 Industrial Disc Printers. Then came the DX-2 Dual Drive Printer & Publisher.

Now you can get the benefits of both with the entry-level price tag of the DX-1! A single, **high-speed DVD/CD combo drive** and **robust software** make designing labels, printing, and burning discs a snap, but don't let the small size and ease of use fool you... The DX-1 is an all in one production package, controlled from your PC over a **single USB 2.0 cable** using the included software suite.

#### Now, you can:

- Create and submit multiple unique jobs simultaneously
- Print at up to 4800 dpi Resolution
- Burn at 16x (DVD) or 48x (CD)
- Load up to 100 Discs and walk away!

The DX-1 Disc Publisher is ideal for businesses and organizations requiring frequent short runs of discs. Churches, Schools, Small Office/Home Office, Sales and Marketing Departments, Videographers, and Recording Studios will benefit from its innovative design and low price point.

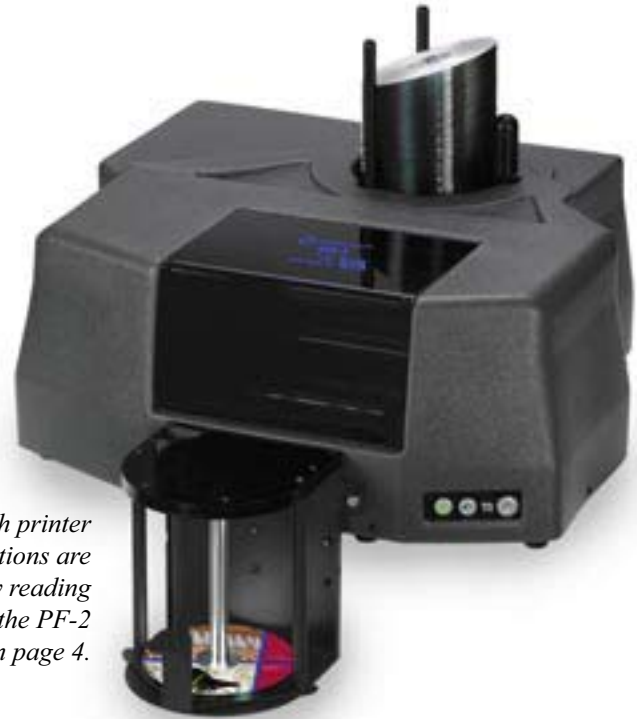

#### Software Suite Includes:

- Prassi Zulu2 Recording & Automation Software
- Sure Thing Label Design Software

#### Features Include:

- Easy-to-use interface, even for novice users
- Burn virtually any DVD or CD Format, including dual layer
- Set up multiple jobs with any quantity, and walk away - unattended burning and printing of up to 100 discs at a time!

## DX-1 DVD/CD Desktop Disc Publisher
