## **Solstice Technologies announces a new PC hosted multi-disc printer autoloader from R-Quest!**

Port St Lucie, FL, October 9, 2006: Solstice Technologies is proud to announce the release of the new H-3000, PC hosted multi-disc auto-printer. H-3000 is now available worldwide from Solstice Technologies.

"The H-3000 is an industrial grade 120mm (CD/DVD//BD/HDDVD disc) auto print station that connects to your PC via a USB2. The compact desktop-footprint of the H-3000 is ideal for any office or production environment." quotes Ian Robertson, CEO of Solstice. "This allows the user to print discs from their favorite graphics program without the need for creating a .prn file".

The H-3000 currently supports a variety of different printers with printing technologies from ink jet to dye-sublimation. With a holding capacity of 220 discs, the H-3000 was designed to print the discs while unattended. In addition the H-3000 includes a separate labeling program to provide the user with further options.

The H-3000 will begin shipping immediately.
